

OlaCars User Manual: Table of Contents

This manual is structured around core business workflows, helping you understand how to navigate the application based on real-world processes.

1. System Hierarchy & User Roles

Understanding the organizational structure within OlaCars.

- **1.1 Full Hierarchy Overview:** The chain of command from Executives to Operational Staff.
- **1.2 Role Descriptions & Functions:** A short, practical summary of what each role does in the system (e.g., Financial Admin, Branch Manager, Workshop Manager).

2. Permissions & Access Control

Understanding who can do what in the application.

- **2.1 Default Role Permissions:** Detailed matrix of what each role can view, edit, or delete.
- **2.2 Staff Creation Rights:** Explanation of which specific roles have the authority to add new staff members to the system.

3. Staff & Administration Management

Guides for managing human resources.

- **3.1 How to Create Staff Members:** Step-by-step guide to adding employees.
- **3.2 How to Create Admins:** Specific instructions for onboarding users with elevated administrative access.
- **3.3 Directives & Performance:** How to assign tasks and track staff performance.

4. Driver Onboarding Process

The end-to-end flow for bringing a new driver into the system.

- **4.1 Driver Registration:** Creating the driver profile and uploading necessary documents.
- **4.2 Legal Agreements:** Generating and signing driver contracts.
- **4.3 Driver Assignment:** Linking an approved driver to an active vehicle.

5. Vehicle Onboarding Process

The end-to-end flow for inducting a new vehicle into the fleet.

- **5.1 Pending Entry:** Initial logging of a newly purchased vehicle.
- **5.2 Active Fleet Induction:** Moving the vehicle to "Active" status.
- **5.3 Scraps & Write-Offs:** The workflow for decommissioning a vehicle from the fleet.

6. Financial & Transaction Flow

How money moves through the OlaCars system.

- **6.1 The Complete Transaction Lifecycle:** A high-level overview of purchasing, selling, and general ledger integration.
- **6.2 Purchases Flow:** Purchase Requests -> Purchase Orders -> Bills -> Payments Made.
- **6.3 Sales & Collections Flow:** Customers -> Invoices -> Overdue Tracking -> Payments Received.
- **6.4 Accounting Settings:** Chart of Accounts, Tax Management, and Bank Accounts.

7. Insurance Management

Tracking risk and policy compliance.

- **7.1 Vehicle Policies:** Adding and renewing insurance policies for the fleet.
- **7.2 Insurance Providers:** Managing the directory of insurance companies.

8. Accident Reporting & Resolution

Workflow for handling vehicle incidents.

- **8.1 Logging an Accident Report:** How to properly record the details of an incident.
- **8.2 Insurance Claims:** Tracking the financial recovery process for the accident.
- **8.3 Workshop Repairs:** Tracking vehicle repair status at a workshop.
